

**Wah Yan College Kowloon**  
**S.6 Chemistry Scheme of Work (2016-2017)**

<b>Textbook</b>	1. New 21st Century Chemistry 6 Topic 14 Industrial Chemistry (Elective Part) (1st Edition) (WY) 2. New 21st Century Chemistry 8 Topic 16 Analytical Chemistry (Elective Part) (1st Edition) (WY)
<b>Other Resources</b>	

**SL:** Scheduled number of lessons

**AL:** Actual number of lessons

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
<b>First Term (1/9/2016-2/1/2017)</b>			<b>Topic 14 Industrial Chemistry</b>				
			<b>Unit 45 An introduction to industrial chemistry</b>				
	1	SL	45.1 What is chemical industry?	<ul style="list-style-type: none"> <li>Chemical industry converts raw materials into products of greater value to us</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> <li>Discussion</li> </ul>	I,II	
	1	SL	45.2 Products from the chemical industry	<ul style="list-style-type: none"> <li>Five categories of products from the chemical industry</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> <li>Discussion</li> </ul>	I,II,III	
	1	SL	45.3 <b>The operation of a chemical process in industry*</b>	<ul style="list-style-type: none"> <li>Feedstocks</li> <li>Batch and continuous operations</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> </ul>	I,II	
	1	SL	45.4 Petrochemical industry	<ul style="list-style-type: none"> <li>China's petrochemical industry</li> <li>Sustainable development</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> <li>Discussion</li> </ul>	II	
	1	SL	45.5 <b>Production of vitamin C*</b>	<ul style="list-style-type: none"> <li>Comparing two processes of producing vitamin C</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> </ul>	II	
	2	SL	45.6 The use of catalysts	<ul style="list-style-type: none"> <li>Why bother with reaction</li> </ul>	<ul style="list-style-type: none"> <li>PowerPoint</li> </ul>	II	

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
				kinetics?	• Discussion		
	2	SL	45.7 The effect of change in concentration on the rate of a reaction	<ul style="list-style-type: none"> <li>• Rate equation</li> <li>• Rate constant</li> </ul>	• PowerPoint	II,IV	
	2	SL	45.8 Order of reaction	<ul style="list-style-type: none"> <li>• Overall order of reaction</li> <li>• Zero, first and second order reactions</li> <li>• Rate-concentration graphs</li> <li>• Concentration-time graphs</li> </ul>	• PowerPoint	I,II	
	2	SL	45.9 Units of rate constant $k$ for reactions of different order	• Units of rate constant $k$ for zero, first and second order reactions	• PowerPoint	I,II	• Checkpoint
	2	SL	45.10 Experimental determination of the rate equation for a reaction — the method of initial rate	<ul style="list-style-type: none"> <li>• Determining initial rates from different concentration-time curves</li> <li>• Using the reciprocal of the time required to produce a small amount of a product as a measure of the initial rate</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Activity 45.1 — Determining the rate equation for the reaction between sodium thiosulphate solution and dilute sulphuric acid using a microscale chemistry experiment</li> </ul>	I,II	
	3	SL	45.11 Using the iodine	Using the iodine clock method to	• PowerPoint	I,II	• Checkpoint

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values#	Consolidation and Assessment
			clock method to determine the rate equation for a reaction	determine the rate equation for the reaction between peroxodisulphate ion and iodide ion	<ul style="list-style-type: none"> <li>•Activity 45.2 — Determining the rate equation for the reaction between acidified propanone solution and iodine by colorimetry</li> <li>•Activity 45.3 — Determining the rate equation for an iodine clock reaction</li> </ul>		<ul style="list-style-type: none"> <li>• Unit exercise</li> </ul>
			<b>Unit 46 Factors affecting the rate of a reaction</b>				
	3	SL	46.1 The effect of change in temperature on the rate of a reaction	<ul style="list-style-type: none"> <li>• Illustrating the effect of temperature change on the rate of reaction using the reaction between dilute sulphuric acid and sodium thiosulphate solution</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	IV	
	3	SL	46.2 A further look at the collision theory	<ul style="list-style-type: none"> <li>• Basic ideas of the collision theory</li> <li>• Energy profiles</li> <li>• Activation energy</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,II	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>
	3	SL	46.3 The energy distribution curve	<ul style="list-style-type: none"> <li>• Maxwell-Boltzmann distribution curve for the distribution of</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,II	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
				molecular kinetic energy for a gas <ul style="list-style-type: none"> <li>• Effect of increasing temperature on the energy distribution curve</li> <li>• Explaining the effect of temperature on the rate of reaction</li> </ul>			
	4	SL	46.4 Rate equation and reaction mechanism*	<ul style="list-style-type: none"> <li>• Energy profile for a reaction which takes place in more than one step</li> <li>• Linking the rate equation to the reaction mechanism</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>
	4	SL	46.5 The Arrhenius equation	<ul style="list-style-type: none"> <li>• Determining the activation energy for a reaction by using the Arrhenius equation</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Activity 46.1 — Determining the activation energy for a reaction</li> </ul>	I,II	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>
	4	SL	46.6 Catalysts	<ul style="list-style-type: none"> <li>• Positive and negative catalysts</li> <li>• Features of catalysts</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I	
	4	SL	46.7 How does a catalyst work	<ul style="list-style-type: none"> <li>• Energy profiles for an uncatalyzed reaction and catalyzed reactions</li> <li>• Homogeneous catalyst and heterogeneous catalyst</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Activity 46.2 — Catalyzing the reaction between peroxodisulphate ion and iodide ion</li> </ul>	III,V	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
	5	SL	46.8 Heterogeneous catalysis*	<ul style="list-style-type: none"> <li>• Illustrating how a heterogeneous catalyst works by using a model for the reaction pathway for the formation of ammonia from nitrogen and hydrogen</li> <li>• Catalysts in catalytic converters</li> <li>• Catalyst poisoning</li> </ul>	• PowerPoint		
	5	SL	46.9 Homogeneous catalysis*	<ul style="list-style-type: none"> <li>• Illustrating how a homogeneous catalyst works by using the oxidation of iodide ion by peroxodisulphate ion</li> </ul>	• PowerPoint	II,IV	
	5	SL	46.10 Enzyme catalysis	<ul style="list-style-type: none"> <li>• Making ethanol by fermentation</li> <li>• Why are enzymes so popular in chemical industry?</li> </ul>	• PowerPoint	II,IV	<ul style="list-style-type: none"> <li>• Checkpoint</li> <li>• Unit exercise</li> </ul>
			<b>Unit 47 Industrial processes</b>				
	5	SL	47.1 Building a chemical plant in a city	<ul style="list-style-type: none"> <li>• Using a scenario of building a chemical manufacturing plant as an introduction to three industrial processes: <ul style="list-style-type: none"> <li>– manufacture of nitrogenous fertilizers</li> <li>– manufacture of chlorine gas</li> <li>– manufacture of methanol</li> </ul> </li> </ul>	• PowerPoint	II	
	5	SL	47.2 What do plants need	<ul style="list-style-type: none"> <li>• The nitrogen cycle</li> </ul>	• PowerPoint	I,II	

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
			to grow properly?	<ul style="list-style-type: none"> <li>• Three main nitrogen fixation processes</li> </ul>	<ul style="list-style-type: none"> <li>• Animations</li> </ul>		
	6	SL	47.3 Nitrogenous fertilizers	<ul style="list-style-type: none"> <li>• Straight N fertilizers and NPK compound fertilizers</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,III	
	6	SL	47.4 Ammonia — the key to nitrogenous fertilizers	<ul style="list-style-type: none"> <li>• Feedstocks</li> <li>• Reaction conditions</li> <li>• Flow diagram for the Haber process</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	II,IV	
	6	SL	47.5 Obtaining an economic yield in the Haber process	<ul style="list-style-type: none"> <li>• Temperature</li> <li>• Pressure</li> <li>• Reaction conditions most manufacturers use</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Animations</li> </ul>	I,III	
	6	SL	47.6 From ammonia to nitrogenous fertilizers	<ul style="list-style-type: none"> <li>• Main stages in the manufacture of nitric acid from ammonia</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Discussion</li> </ul>	IV,V	
	6	SL	47.7 Working on large scale production of nitrogenous fertilizers*	<ul style="list-style-type: none"> <li>• Storage of raw materials</li> <li>• Transport of materials</li> <li>• Transfer of heat</li> <li>• Separation</li> <li>• Process control</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	IV,V	
	6	SL	47.8 NPK compound fertilizers	<ul style="list-style-type: none"> <li>• Flow plan for the manufacture of NPK compound fertilizers</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,II	
	6	SL	47.9 The pros and cons of fertilizers	<ul style="list-style-type: none"> <li>• Agriculture — the key to poverty reduction</li> <li>• Environmental problems</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Animations</li> </ul>	I,II	

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
				associated with the use of fertilizers			
	7	SL	47.10 The chloro-alkali industry	<ul style="list-style-type: none"> <li>• Common uses of hydrogen, chlorine and sodium hydroxide</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,II	
	7	SL	47.11 Manufacture of chlorine	<ul style="list-style-type: none"> <li>• Mercury electrolytic cell</li> <li>• Diaphragm cell</li> <li>• Membrane cell</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Animations</li> <li>• Discussion</li> </ul>	I	
	7	SL	47.12 Uses of methanol	<ul style="list-style-type: none"> <li>• Chemicals produced from methanol</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	II	
	7	SL	47.13 From natural gas to methanol	<ul style="list-style-type: none"> <li>• Main stages in the manufacture of methanol from natural gas <ul style="list-style-type: none"> <li>– syngas generation</li> <li>– methanol synthesis</li> <li>– crude methanol purification</li> </ul> </li> <li>• Changes in the production process of methanol</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Discussion</li> </ul>	I,II,III	
	7	SL	47.14 Methanol — a green feedstock?	<ul style="list-style-type: none"> <li>• Methanol from biomass</li> <li>• Methanol from carbon dioxide captured from flue gas</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,II,III	
	7	SL	47.15 Choosing a site for a chemical plant*	<ul style="list-style-type: none"> <li>• Factors to consider when choosing a site for a chemical plant</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Discussion</li> </ul>	I,II	<ul style="list-style-type: none"> <li>• Unit exercise</li> </ul>
			<b>Unit 48 Green chemistry</b>				
	7	SL	48.1 Sustainable development and	<ul style="list-style-type: none"> <li>• Meaning of sustainable development</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,III	

School Term	Weeks	SL/AL	Topics/ Extended Parts*	Learning Objectives/ Teaching Focus	Teaching and Learning Activities	Values <sup>#</sup>	Consolidation and Assessment
			green chemistry	<ul style="list-style-type: none"> <li>• 12 principles of green chemistry</li> </ul>			
	8	SL	48.2 Feedstocks from renewable resources	<ul style="list-style-type: none"> <li>• Illustrating the use of feedstocks renewable resources by using an example of producing a polymer from corn</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,IV	
	8	SL	48.3 Atom economy	<ul style="list-style-type: none"> <li>• What atom economy is</li> <li>• Calculations involving percentage atom economy</li> <li>• A greener pain reliever — ibuprofen</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,III	<ul style="list-style-type: none"> <li>• Checkpoint</li> </ul>
	8	SL	48.4 Energy efficiency	<ul style="list-style-type: none"> <li>• Methods for making industrial processes more energy efficient</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> </ul>	I,III,V	
	8	SL	48.5 Manufacture of acetic acid in industry	<ul style="list-style-type: none"> <li>• Oxidation of naphtha or butane</li> <li>• The Monsanto process</li> <li>• The Cativa process</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Discussion</li> </ul>	I,III,V	
	8	SL	48.6 Green chemistry and the life cycle of a product	<ul style="list-style-type: none"> <li>• Stages of the life cycle of a product</li> <li>• How green chemistry can facilitate environmental improvements in the life cycle of a product</li> </ul>	<ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Discussion</li> </ul>	I,III,V	<ul style="list-style-type: none"> <li>• Unit exercise</li> </ul>

	17-18		Christmas & New Year Holiday				
<b>Second Term (3/1/2017-17/7/2017)</b>	19		Revision week				
	20-21		Mock Examination				
	22-23		Lunar New Year Holiday				
	24-26		Revision week				

\* The extended parts should be marked with asterisks. These parts should be more challenging and can be covered when the students can master the knowledge and skills covered in the conventional topics.

## # Core Values of Wah Yan College, Kowloon

- I. Love and care
- II. Strive for excellence
- III. Respect and Justice
- IV. Responsibility
- V. Faith

### Sustaining values

- I. Love and care
  - ◆ Accept & feel positive about himself
  - ◆ Appreciation & Gratitude
  - ◆ Empathy & Compassion
  - ◆ Forgiveness & Reconciliation
  - ◆ Service
  - ◆ Family as a basic unit of society; marriage is the foundation of a family
- II. Strive for excellence
  - ◆ Reflective
  - ◆ Commitment
  - ◆ Perseverance
  - ◆ Curiosity & willingness to learn
  - ◆ Value imagination and creativity
- III. Respect and Justice
  - ◆ Life is valuable and respectable
  - ◆ Openness to good in all things
  - ◆ Respect for himself & others
  - ◆ Integrity
  - ◆ Faithfulness
- IV. Responsibility

- ◆ Freedom & Self-discipline
- ◆ Care for the environment
- ◆ Social Identities: citizen identity, national identity and global citizen identity

#### V. Faith

- ◆ Experience of God
- ◆ Explore & practise one's faith
- ◆ Appreciate religious liturgies
